*Untagged*

The Brazilian Keratin Treatment is a revolutionary treatment that straightens hair for an extended period of time (usually about 3 months or longer). The main ingredient, Keratin, is a vital element in the component of hair. Since the keratin protein that we deal with is usually dead, such as is the case with hair and nails, the thicker the level of keratin, the healthier the hair is. Having this thicker layer will keep the external layer moisturized, preventing cracking as well as splitting. The Keratin Treatment is just that, a treatment. It is NOT a chemical process by any means. It is safe to use on all types of hair, although the treatment works best on previously chemically treated hair, since this type of hair is usually more damaged and has a lower level of keratin protecting the hair cells. The treatment is not permanent. It can last anywhere between 3 to 6 months or longer. As a &quot;side effect&quot; of the treatment, the hair will be straight, shiny and frizz free. It is the perfect treatment if you have damaged hair, or if you would like to cut your blow-drying time in more than half! If you are interested, come in or call to have a consultation done. Prices start as low as \$120!
